CHAPTER I   Level 1

Introduction   Level 2

Review of the Literature.   Level 3
Definitions.   Level 4
Technology and its users.
Social learning theory and technology.
History of telepsychology.
Benefits of telepsychology.
Increased access to care. Level 5
Delivery of care to special populations.
Ethical, clinical, and legal issues in telepsychology. Level 4
Ethical and clinical issues. Level 5
Privacy and confidentiality. Level 6
Informed consent.
Assessment and advertising and public statements.
Competence.
Legal issues.
Research in telepsychology.
Telepsychology in the treatment of specific disorders.
Addictions.
Anxiety.
Depression and grief.
Social phobia.
Effectiveness of telepsychology for other types of psychological disorders.
Provision of telepsychology through different technological media.
Telephone and videoconference.
Internet – e-mail, websites, and real-time chat.
Mobile phones.
Other areas of research in telepsychology.
In-person treatment versus remote treatment.
Therapeutic alliance.
Perceptions of telepsychology services.
Psychologists' use of telepsychology.
Statement of the Problem
Statement of Hypotheses

CHAPTER II

Method

Participants
Measures
      Demographic sheet.
      Use of Telepsychology Questionnaire.
      Telepsychology Attitude Scale.
Procedures
Design and Analysis

CHAPTER III

Results

CHAPTER IV

Discussion

Limitations of the Study
Implications for Future Research
